

Bibliographic suggestions- Annotated

In thematic not alphabetic sequence.

Alphabet of the Heart by Dan Winter <http://spirals.eternite.com> Origin of Alphabets in the electrical structure & firing of the heart & emotion. A classic.

Alphabet of the EarthHeart by Dan Winter <http://spirals.eternite.com> Origin of ceremonial magic in the origins of symbol and shape of emotion. Exquisite editing and illustration by Vincent Bridges and Darlene.

Return of Enki by Dan Winter soulinvitation.com/enki Sumerian connection to Draco's and the origins and purpose of Earth DNA in the galaxy

Tutankhamon Prophecies by Maurice Cotterel- Best solar physicist on the planet on the subject how does the solar wave compression pattern impact Earth cultures. This is the physics behind the more myth based Mayan Calendric materials.

Spiral Calendar by Carolan. First part is great: learn that events in time HAVE to arrange themselves on a spiral in time, in order to emerge from chaos. Nice analysis of huge historical patterns. Second part is terrible. Using that to predict stock markets is fine IF you can understand the principle. But if you entirely miss that recursion is what makes oscillators self-aware - then you just confuse people into soul bleeding greed. better read- soulinvitation.com/stockmkt/stockmkt.html

Gramatical Man - Information, Entropy, Language and Life by Jeremy Campbell. The reason DNA gets to replace any error message - is context richness. This means nesting or braid coherence creates high signal to noise ratio. Fascination comparison of DNA structure to language and programming structure. Enriching.

Cosmic Serpent - Jeremy Narby Is DNA an intelligent SHAPESHIFTING WORM?

Raw and the Cooked - by Mircea Eliade. Is the REASON you cook your food -because you do not have enough confidence in your inner FIRE / IMPLOSION to access/ commune / fuse with the spin memory in your food? In ancient history cooking served a purpose in fusing tribes by phase locking around fire. (PHIRE..?)

Civilization and it's Discontents by Sigmund Freud - Urge to touch frustrated becomes ANGER .. Siggy - eros has an electrical meaning beyond the shape of your own cigar.

Memories, Dreams and Reflections by Carl Jung. Do YOU know why the Balinese Cock fight - explains the need of testosterone poisoning to HIT instead of TOUCH - as the true origins of FOOTBALL?? Why does pigskin symbolize the anality of the poison pellet: ANGER-which is urge to touch frustrated. If you COULD teach your teenage boys permission to touch (non-destructive compression) toward bliss / charge density they might not HAVE to waste half the genepool in destructive 'sport'. (This has been a paid political ad for the National Football League).

Synergetics by Buckminster Fuller- Bucky taught us the geodesic at Univ Detroit- as we walked his dome onto the architecture school foundation, and then in Florence Italy - as he showed us personally his vector flexing. Got the weakness of the cube as a wave structure right - doesn't know about the compression into implosion of the dodec tho.

Genesa by Derald Langham - Presented in Florence at the 2nd Conference sponsored by Jaccaci, along with Winter. Building sacred geometric structure large enough for young people to experience from the inside out.

Genesis Revisited, Twelfth Planet, Lost Book of Enki, etc. by Zachariah Sitchin. Good to get the cobwebs of the disastrously mistranslated bible out of your head - with some cave man quality Sumerian. At least these were REAL cave men. If SHEM means highward fire stone and not ALTAR unto the Lord - then how does a magnetic dolmen make the fractal needed to compress accelerate your 'prayer' into heaven...? a Djed Ai Question. Would an Arc on a Torus -ar-thur raise that sword (MAG line) from that STONE (MAG circle / mass?)

Voyagers and Amenti series by Anna Hayes. Anna heard right in some of the early material. The politicals of changing Annunaki interventionists preying on Earth's genepool make a colorful tell. Too much ancient ET history detail..

Innana Returns by Ferguson (innanareturns.com) Were you there when the reluctant younger sister (half Dragon queen /Draco - 'Innana' apologized to the human genepool for so cavalierly

Law's of Form - by Spencer Brown. Deriving the entire CALCULUS from the simple bracket idea that either I am inside you, or you are inside me. Imagine an algae- eats its neighbor and folds that memory into it's surface. Then you eat me, he eats you, someone eats him, ad infinitum. That is the way single celled organisms CONSUME PERSPECTIVE. Now if each time someone eats (or we could say - touches) someone else - the amount of spin foldedness which is PHASE COHERENT (Shareably pure intent - pure principle) then adds it spin as new fold (makes it's DENT) on the winning membrane - THEN you could express the INFINITE NESTING as a series of BRACKETS - (either open parenthesis or close parenthesis). Then in order to understand the evolution of CON-SCIOUS-NESS (WITH -sc-ious-ness - LITERALLY meaning WITH TURNING INSIDE OUT - NESS) would be to to express the spin path back in history as to what spin was nested inside what other spin. Inside of - outside of -inside of... ad infinitum. Until - **you had derived the complete origin of CALCULUS - as a simple way to track back ONE worm hole turning either inside out or outside in - itself - inPHIkntly!**

Structural Stability and Morphogenesis- by Rene Thom. Once you understand WHY no cell membrane has stability unless the foldedness which makes up its surface - its self/not-self - IS MADE ONLY OF SINE WAVES IN MUSICAL PHASE (COHERENCE) THEN you can teach WHY AIDS only spread in Africa AFTER the tribal BLISS dances were forgotten. The BLISS is the COHERENCE of the PHONON - sound wave in liquid - which feeds the mem-brain.

ShuffleBrain - by Paul Pietsch pietsch@indiane.edu - Neuroscience for Kids - how does the brain store mind. Teach a worm to steer a maze: then feed that worm to a 2nd, and then the 2nd worm is better at steering the maze learned by the first! Is the molecular mechanism of CELLULAR MEMORY - in fact a wave? Is the DNA such a shape-shifter as that worm.

Rhythmns of Vision -by Lawrence Blair... Pics of the 3D platonic nested on the Chakras - a bit fanciful - but a good intro to see that vision (perception) is the result of symmetry. A classic.

Stream of Consciousness in the Modern Novel- from Joyce to Virginia Woolf - whose flow of inner voice is singing in YOUR DNA - is it everyone's voice at once?

Love's Body - by Norman O Brown. Did James Joyce use the SHAPE of Dublin for the shadow of his drunk Irishman stupored on his back - for the same reason that Rome (Uru-an- Uru an is, Uru m ania,..Uru shaliam) had 7 hills. Does inhabiting the land REQUIRE the shape of LOVE's Body IN the land.

Finnegan's Wake - by James Joyce - Celebrate - and again awake Fin end again.Have you seen the comedy of death against the tragedy of life like a play on 'words' - elements of spin.

Genealogy of Morals in the Birth of Tragedy - by Nietzsche . Why does it require the ability to celebrate TRAGEDY to HAVE morals. Is the perception of the presence of a longer wave(the BIG picture) the result of the experience of the COMPRESSION of a shorter one?

Sentics- by Manfred Clynes. Look closely at WHY the SHAPE of the folds of Michelangelo's PIETA is the exact wave form for the measured 'Sentic' SHAPE of the pressure wave of TOUCH which expresses GRIEF. Later Manfred presents his measurement - in the NOVA TV series 'What is Music' that the SAME shape for the squeeze that says I LOVE YOU etc., is used IN EVERY CULTURE ON EARTH. Is that (Universal / Ubiquitous) GEOMETRY OF PRESSURE - sacred?

Hebraic Tongue Restored - Origins of the Adamic Race - by Antoine Fabre D'Olivet. Classic serious root of much of western esotericism - if properly understood. (may be available from Health Research Press, CA.USA). By looking at the MEANING OF THE SHAPE ONLY! OF EACH INDIVIDUAL HEBREW LETTER,

D'Olivet - one of histories great linguists- **RETRANSLATES GENESIS**. Instead of “ IN the beginning” - he give us “At first in principle the origin of thing-ness” - which later (in Alphabet of the Heart by Winter - here echoing his legal parasite Tenen) becomes the **sequence of symmetry view shadows of seven steps from outside in to inside out - on the self-organizing golden spiral on the 7 color moebius - casting exactly only the shadows of the 7 letters of Braeshith - (The first word of Genesis) which is literally - ONLY - the sequence of symmetry operations/ TURNS OF MIND - necessary to turn inside out on the surface of a donut. And literally (by compressing charge) become the origin of mass out of light. ... restoring the Hebraic Tongue.** (Phire in the mouth of a Draco-n).

Enochian Physics and Origins of GOLDEN DAWN magic - from John Dee (assorted literature - also links soulinvitation.com/ophanim soulinvitation.com/enochian also writings of Vincent Bridges).

Willed Mutation of the Species - by Satprem. At least presents the romantic idea of how a genepool as a field effect could come to have INTENT in steering its long term racial self direction. For example - did the giraffe gene get a long neck ability - by YEARNING? - probably yearning here is the same as - to hunger. Winter's notion that implosion in the coeur of DNA electrically creating the ability to suck (and push) charge thru the speed of light - as the origin of self-steering ability (time-travel / bardo navigation/ lucid dreaming) is likely considerably more sophisticated scientifically - but builds nicely on this original classic.

PsychoNavigation - Techniques for Travel Beyond Time, by John Perkins. Psychonavigation for sailing... and shamanic dreaming? Compare the evolution of the ability to navigate by direct inner perception of your electromagnetic orientation to waves from stars - WITH + the possibility of steering when you die (bardo navigation - see soulinvitation.com/eternality for the geometry mapped of what you will see when you die), or WITH + the evolution of the TEMPLAR attempt to complete the ORION QUEEN (Guardians of the Grail - book) star navigating origins of navigation in western history - later described in 'Holy Grail Across the Atlantic' book. (Remember as you do the Hodowanec / Ramsey work evidencing the physics of astrology: that star events reach Earth faster than light measured in the output harmonics of a sensitive capacitor in a pristine place- pic in book. Is your brain synapse and cavity when resonating COHERENTLY in fact the best capacitor to catch long waves.. 'Cymatically'?). What is wrong with Karl Pribram's view in "Holographic Brain" from spectral data - that THERE IS NOTHING FLAMMABLE AT THE SYNAPSE ? Does MIND NOT INHABIT Phire? What Hawaiian scholar says that Polynesian navigators could orient themselves to the phase angle of an ocean wave bouncing off a continent 2000 miles from their canoe - by feeling it '**in their balls** (testicles) '? Have you watched birds get dizzy if they place themselves where magnetic lines are dizzy? Does this tell you where you do NOT want to die? Why does a Cherokee only choose to die where the little hill is fractal to the mountain in the distance? Can you unpack that unawareness non-destructively?

Holographic Brain- by Karl Pribram. What he missed: as he stood behind Winter at Heart Math Institute showing them the harmonic analysis of a HEART feeling passion saying 'I don't think we could DESIGN an oscillator to do that!' - That the phase discipline in the optical cortex hologram which determined if your dreaming was lucid and reality creating- specifically required that the symbol map (origin of alphabets you used) be THE GOLDEN SPIRAL on the donut - BECAUSE that is what enables charge to COMPRESS - make matter out of light - from the synaptic hologram. When the inner hologram (optical cortex) is self-similar to the outer hologram (matter is a 'hologram with a weight problem') - that is to say FRACTAL - then 'your wishes become horses so beggars ride'. Read how the lady who lightened her purse by turning her mirror and her magnifying glass into holograms - frustrated that at first only other items INSIDE the same hologram could be seen in her new mirror and magnifying glass - until she learned (by lucid dreaming?) SHE COULD ONLY SEE HERSELF IN THAT MIRROR IF SHE BASKED IN THE ORIGINAL LIGHT! (story in 'Alphabet of the Heart', Winter).

Starlight Elixirs - Hilarion / Pegasus Press.. Lists the psychological effects on Earth from cultures on many stars. (Initially by focusing specific stars light into water for healing purpose). Compare with the index of which star systems were most respecting of the prime directive- do not interfere- when genetic interventionism on Earth involved as many as 22 ET civilizations. (in Anna Hayes book - Voyagers , also lettersfromandromeda.com)

Macro-dynamics - by Ralph Abraham. So sad that while he had real proof of the physics of astrology by watching viscous waves make the same pattern for each major star crossing alignment - there was no attempt to present that insight. Years later presenting in Netherlands - no evidence of the simple essential insight that the ONLY path out of chaos - is self-similarity permitting infinite collapse - so easily measured looking for PHI ratio in the power spectra - OF ANYTHING - (becoming self-aware).

Cymatics- by Hans Jenny. Probably the planets best pictures of the sacred geometry of waves crossing themselves ('in blessing') - if you can afford the books (probably out of print).

Vortex of Life (formerly Fields of Form)- by Lawrence Edwards (Floris Books & some Anthroposophic outlets) . (also presented later by Nick Thomas to the Netherlands 'Implosion Group'). If you were frustrated that the projective geometry Steiner material never told you that line drawings to project geometry - ARE wave paths for charge only - then this is balm. Nick presented eloquently THAT the PINE CONE breathes open and shut with exquisite geometry and gentleness in phase to the seasonal need - but not WHY (to adjust the AMOUNT OF WATTAGE IT NEEDS TO EXTRACT FROM GRAVITY.. by IMPLOSION!). This is also the reference for the 7 layers of Heart Muscle (Pettigrew dissections discovering the 7 spin symmetries of the tetra in the heart muscle layers- see pic.) angled to present the shadows of the Hebrew Alphabet on the cave walls of the Thymus - in Alphabet of the Heart, Winter.

VORTEX MOMENTA HEART PUMP MODEL, The Heart is Not A Pump- by Ralph Marinelli, Royal Oak , MI, USA. (Research Paper not book) - (also described by Jennifer Greene - Maine Flowform group.) The reason the heart's phonon / sonic information travels so efficiently with harmonic components richly embedded - is that the heart is not a pump. It sequentially squeezes each of the needed 7 layers of muscle (Alphabet of the Heart - 7 tetra spin subset of all symmetry) in the right PHASE sequence to design a VORTEX tornado in ANY possible useful TILT ANGLE (phase). This to push the FIELD of magnetic blood carried by the blood as a twister which then travels COHERENTLY to your extremity. Close your open hand while making a spinning motion like spinning up a top - *that is your heart muscle casting off tornados one by one - hoping they will last.*

When Time Breaks Down- by Arthur Winfree. Altho he did not agree or understand that the self similarity of the nervous electrical fibres where the heart is electrified - is the fractal capacitive catcher's mit grail - which asks where the stars are IF there is enough still point rest between each beat (thank God at least Rollin McCraty, Heart Math, DID know enough to spectrum analyze the EKG in the flat rest instant BETWEEN beats at VERY high sampling rates).. Arthur did put together one of the best pictorials on the turning inside out toroidal donut nests of the hearts source of voltage. (Without of course having a clue that the SOURCE of that voltage similar to the fresh egg's DC voltage source - was implosion from gravity itself).

Theory and Design of Quartz Crystal Oscillators - by Virgil Bottom . Technology of designing quartz oscillators for electrical circuits. Standing watching them check the thickness of the quartz wafer grind in the lab in Carlisle Pennsylvania, by waiting until the radio nearby buzzed at the right frequency --- I realized that the reason astrology works is because at the moment of the birth of EACH BOND - the electrical phase lock by containing an infinite harmonic series - stores a capacitive map to the position of every STAR by phase or tilt angle - as the star was aligned at the time the bond CHRISTallized. (Since Gravity is capacitive charge moving in a wind between frequencies up past the speed of light) . That charge steers the liquid into the bond- the physics behind water drop geometries, Immoto, and Kirlian's light. Radiate charge and you in- FORM.

Atlantean Fire Crystal - papers by Louis Acker (privately published) also co-authored Handbook of Astrology. Too much LSD or not - Louis did remember his Atlantean scientist incarnations well enough to plot the hex symmetry of the doped quartz implosion crystals of Atlantis. (Edgar Cayce terms the TUOAI STONES - researched by physicist SUTTON). Using implosive charge sources - the cool light that did not consume - was not in itself the loss of the genepools self-direction - what cost the tectonic gravity it's stability was USING them to deprive the masses of their freedom!! (Take a lesson - US - CIA.)

Fractal Self-Similarity of the Heart - Fibres of Perkinjole - Electrification - papers by Ary Goldberger, MD. Classic early article showing how self-similarity powerfully characterize the hearts nervous branching source of electrification (now extended by Winter to imply implosion as the source of the heart's voltage from gravity during Bliss. / how the breatharian gets power - fractal electrical ENVIRONMENT required). Also nice work on the PHI Golden Ratio based branching of the lung alveoli - also where the body catches PHIRE - oxidation. <http://reylab.bidmc.harvard.edu/people/Ary.html>

Projective Geometry - by Olive Whicher. Original Anthroposophic classic on projecting lines to making elegance in sacred geometric nesting. Beautiful mind expanding - to see for example the GROWTH PATH OF A SEED. (no information about waves or charge).

Eurhythmy - by Steiner (Various Works).. Sacred Dance - Powerful glandular triggers - controversy over whether Steiner in fact conceived of the self-empowering nature of bliss. Bliss pursuit taboo in Germanic culture? (Why do the Brits still act as if WWII rationing hadn't stopped - and the Germans act as if the guilt will never stop.. meantime WHO is doing BLISS?)

Cosmic Humanism - by Oliver Reiser - Perhaps the most spiritual and beautiful of literature arising from the General Systems Theory Movement (hi to Gus Jaccaci).. Can you see a cocoon of coherent charge moving starward from the human genepool fusing in BLISS? .. see:

Genesis Effect in Star Wars... Explosion of growth on billions of planets turning live IF the GENES of ISIS (Enki's Sirian mother) teach implosion to be self-aware.

StarSeed Transmissions - by Ken Carey - Sending baby Christos to fertilize galaxies with the memory of how to turn planets green?

Lazarus Effect - by Frank Herbert and Bill Ransom - (Dune Series) - Was Lazarus related to the MAGdalen. If so how was he instructed to LAZE R-US. Did he laze a way to cohere the genepool by priming the pump thru the death experience. Was Jesus (Tut) skilled in soul retrieval from his mother's genes.. the winged Seraphic Aide.

Uriel's Machine- Star maps in the geometry of Archeologic Paramagnetic sites - for the purpose of teaching the genepool how to predict comets.. to save them. An angelic design. Brilliant - but no info about soul groups using star maps in archeologic land maps - as lens to project soul group pods bliss cocoon starward - navigated significantly by stellar morphic resonance (what was the Alpha Draconis star map at Ankor Wat USED for Mr Hancock)

Heaven's Mirror by Hancock .. (see note in Uriels Machine) Nice projection of Alpha Draconis in Ankor Wat - suggest magnetic function of the lens be taught - for shamanic navigating starward. No info on the politics of the star travelling Draco's whose road map in the sky he pics.

Copper Scrolls. Proof? that after Akhanaton (Enki - Ptah bloodline) completely messed up the royal checkbook - then ran out of town - and took the cash - (treasure).. changed his name to MOSES - (& became a gold powder spice cook - for mechanizing immortality - if you read Genesis of the Grail Kings) . Altho Enlil Yalweh Amun Ra priest politic mob chased him - he succeeded in stashing the cash to found the Essenes. The truthless Rabbi's changed the name of Tutankhamon to Jesus after he was strung up in a tree, out in the desert trying to save his dad. (read 'Out of Egypt')

Out of Egypt and House of The Messiah - Academic tour de force, evidence the Jews (Yalweh) so embarrassed at not being able to genetic engineer any decent genepool - deceitfully changed the name of all their cultural heros - to hide their true Egyptian identity. Akhanaton was Moses, Tut was Jesus.. (Akhsenpahten was MAG).. What - you don't think the timeline works? Read the books.

God King Akhanaton by Daniel Stewart .. Fun to read how Akhanaton's Sirian ET genes - pointy skull - distended spine - made him so wierd no lady would have sex with him. So do you believe that Thoth indulged in the Draco habit of eating live human pineal glands when no other substitute for immortality could be found? Return of Enki soulinvitation.com/enki suggests Akhanaton and Thoth (Hermes / Quetlcoatel..) were all Enki descendants.

Mathematics of The Cosmic Mind , & book “Tetratys” by Plummer (Theosophic Press) - Inspiration for Star Mother Kit soulinvitation.com/tools or heartcoherence.com (Plummer wrote the first intro to the kit)- WHY would the summed internal angles of all the nested platonics equal the years in precession. Is rotation the way time is measured? The prime purpose here is to see why all the platonics (tetra/ octa) that nest inside the cube have edge length ratios exclusively log multiples of two - octave incubation- while all the platonics which self nest outside the cube (dodeca / icosahedron) have edge length ratios exclusively of Golden Mean ratios - in infinite 3D stellation interdigitation.

Primer on Energy , Primer on Rotation. (books) Relative rotation is the only definition and origin of both mass and time. Read WHY all human scarcity derives from attempt to STORE rather than distribute rotation / resource / energy / food /// etc.. . That will clue you to WHY implosion infinitely multiply connects by perfect motionless touch - making distribution infinite and storage eliminated. IF your line of billiard balls (hard spheres) from here to the moon (Bucky Fuller: ‘Nine Chains to the Moon’), had a millionth of an inch space between each one - THEN when you bounced ONE billiard ball directly into this end of the line, it could take a long time (if ever) for one billiard ball to bounce off at the other end - BECAUSE INERTIA WAS STORED BETWEEN EACH INSTEAD OF PERFECT DELIVERY--- however - IF your row of billiard balls to the moon WERE EACH PERFECTLY TOUCHING THE NEXT ONE - then - when you bounce one billiard ball into this end - WOULD THE ONE BILLIARD BALL BOUNCE IMMEDIATELY OFF THE OTHER END NEAR THE MOON - having passed the inertia there faster than light???? This may explain why locking charge in PERFECT stillness in the icy dodeca - can connect the charge in your DNA to every gene based organism - and star - instantly.

Star Man / Star Maker by Olafson? Like Dave disappearing into millions of fractal monoliths in ‘2001’, and showing up **well distributed** to everyones TV set at will - in ‘2010’. Where did the memory go during lightning in **Powder** (the film). Why are lightning strikes some of the most information rich near death experiences? Why does kundalini eliminate the need for near death experiences? Why can Draco’s never stop trying to succeed at near death experiences? (Hint - takes many tries to get it right on ‘Groundhog Day’)

Black Sun - by Samuel Sagan - ‘Point Pairing’ psychic inertia bearing fusion thrust (wherever 2 or more are gathered in my name / envelope) - Sci-Fi Intro to Shamanic Pod (group) gravity bending - star navigating.

Dune Series - Frank Herbert, & Son & Bill Ransom. Much more accurate history of Draco Annunaki than the Bible. Muab Dib is Enki, Harkonen is Enlil. Leto is An. Emporer is Orion Queen (‘Reverend Mother’). Guild Navigators immerse in Gold Powder (spice) in blood to implode / steering the worm. Arrakeis is a star iin Alpha Draconis. Muab Dib - the hero wakes up to find his blood ancestor ‘dad’ (Harkonen / Enlil) is HALF MACHINE. (sound familiar). Maybe HUman could wake up to find - H’IBI-URU ‘dad’ is half borg?

Star Trek - Empire Strikes Back - Useful history of Orion wars - writer learned by living with Phyllis Schlemmer / UK. Luke Skywalker (Enki, Chloridians in the blood are implosion - ANIKIN / Annunaki) wakes up to find out that Dad (Darth Vader / AN) is half MACHINE (sound familiar)..Maybe HUman could wake up to find - H’IBI-URU ‘dad’ is half borg?

Lord of the Ring - Fusing the Ring (of DNA) into implosion inside out (chapter herein) - was a skill shareable to ONLY the ‘pure of heart’. The lost letters of the ring - were that alphabet (H’ibi-URU) of the symmetry of MAGnetic domains - to compress enough charge into DNA to let it ‘ring’.

www.wingmakers.com - Change the BST - blank state technology - which COULD save our genepool from parasitic / vampiric Extra-terrestrials (fallen Nephilim Draco) arriving enmasse - from a TECHNOLOGY to a PSYCHOLOGY. The Tron are interactively able to time travel non-destructively.. BECAUSE their DNA is squirting thru light speed so well. The physics of bliss process to ignite DNA - is the missing ingredient.

IBI-URU (hebrew, niburu)- IBI= bird tribe , URU = DRACO, Dragon, Reptilian. (URUshaliam = Jerusalem, URU-an - rumania and rome, and uranis, and turanesian, ab-RA (enki) Abraham came from UR(u) and started (genetic terrorism of a sort) all ‘religions’. Hebrew: (h’ibi-uru) means ‘crossing over’ in Rabbi. The bird tribe Ophanim crossed their genes with Alphab Draconis Draco URU.. Potentially creating a reptilian brain stem amygdala (mouth of the snake - where testosterone juice is pumped from) capable for pumping well

into the RAPTOR / ure of the vice like grip - talons of the bird brain. Kundalini biomechanics involved to return many plumed ONE.

Guardians of the Grail - by Robert Morningsky. Best history of the Orion Queens. Watch the dissection of the ancient reptilian (Roswell craft strut / & Sirian alphabets) diction from the SHAPE an dproclivities of the oral cavity of the velociraptor. (Wear an umbrella to watch an old lady in Amsterdam get angry). What is the power of spit.. Did you feel a quiver in Jurassic Park? The Grail blood line - is a name for the DrAGon queens questing AGni (fire / implosion / passion) in their blood thru US - their genetic experiment.

Genesis of the Grail Kings by Lawrence Gardner- Gardner tells you the high side of his Draco ancestors - David Icke gives the dirty laundry of the same family.. Could BOTH be right? (Yes). Good background to understand Gold Powder cookery and addiction - and why the Annunaki Draco decided to make a special bloodline ('The Chosen')- to be babysitters to the rest of the donkeys lulu human's for the sole purpose of delivering the instructions from the Draco Annunaki to the stupid humans. This making blood that is royal-became their excuse for manipulating the genes of our royal families for 2000 years as if we were show dogs. Study the science of menstrual blood high in melatonin (oil of messeh / 'Messiah' making - crocodile juice) the royal jelly for the hive mind to feed babies. Our squeamishness around blood hygiene and genetic planning - with all its emotive overtones - needs a good steam cleaning. Just cause Hitler gave genetic planning bad PR, doesn't mean we should give less care(research) to the blood marriages of our children then we do to our dogs. The other extreme is requiring 10 generations of planning to get permission to conceive a child which Enlil / Yalweh brought from the Orion Queen fear of setting DNA free - right to the Jews and to the Aboriginals.

Stalking the Wild Pendulum- & Cosmic Book - by Ben Bentov. One of the original mentors for Winter - Bentov wonderfully documents the resonant biomechanics of kundalini and bliss with excellent cartoons. Where do you think the harmonic diversity of a pendulum is at the moment it reaches its stillpoint between swings? Then read:

Foucault's Pendulum - by Umberto Ecco. A bit heavy on the Templar story-telling. Eventually hints at the useful physics that HOW the little pendulum is COUPLED to the longer one above it, whose tail it swings on - instructs you on the chain of command back up to God. (connectivity of mind at the coeur of DNA).

William Buehler work: (some at soulinvitation.com/buehler) Some of the most extensive Thoth Tehuti inspired TEMPLAR history and practice of the geometry repair of the fabric of time. Pattern of layout archeologically for continent spanning magnetic line making - for the purpose of providing a way in and out for genetic memory into stars.

Flicker - Important history of the TEMPLAR ORIGINS OF FILMMAKING - Visual fusion's psychophysics is key both to Nephilim agenda's of PARASITIZING a race / mind control / to install Insurance and Banking the industries of FEAR - called Piracy when their PR budget is lower (skull and bones). ... AND to the possibility of steering a genepool VISION back into potential star steering and inhabiting.

Taking the Quantum Leap - by Fred Wolf. His best - Truly a great way to BEGIN your study of the physics of consciousness. He even starts on the idea of recursion. Too bad Fred never developed his Spectrograms of the Hebrew Alphabet. - with Soares.

Defending Sacred Ground- by Alex Collier, **Andromedan Perspective.** lettersfromandromeda.com Helpful perspective on how pervasive the parasitism of the Annunaki Draco has been thru history AND the present. "YOU NEED NO LONGER BE SPAWN OF THE NEPHILIM" means if you don't succumb to the government waves of fear mongering producing the fear juice they eat - THEN you could develop your BLISS - igniting your DNA into precisely what would TOAST the lo grade DNA of the parasites. (Don't shoot the parasite in your belly - Mr. Pasteur - be grateful it is there - so you can learn from it - why it is there:- you ate death - dead food - or a dead idea like God is outside you - your parasites helpfully consume the death out of you - what they eat is everything that does not serve your implosion / bliss. Anything that implodes or fires like passion in DNA - burns every parasite in sight - because lo grade DNA cannot withstand compression / implosion - like the sailors at Montauk whose DNA was not up to speed... Here comes the rapture - are you **left behind?**).

Beginners Guide to Constructing the Universe - by Michael Schneider. Perhaps one of the best starter places to learn the universal consequences of Sacred Geometry. Just what the title says.

Pandora's Box by Alex Christopher - A fairly revolting level of detail on the Royal French King Louis fortune / bloodline (from Magdalen down thru Merovigian etc.) taking the remnant after the French Revolution to Tryon, North Carolina - (Louis XVII?renamed Daniel Peyseur) - funding the (Borg / Orion) railroad cartel - which becomes the Rockefeller wealth? Does not ask if Winthrop really sired Bill Clinton. Nice local detail - missing **the big picture (Orion queen family - humpty dumpty's {dragon's} EGG - couldn't put itself back together again. Fallen Nephilim can't find the symmetry recipe to immortalize DNA ... tsk tsk. Hint: soul pod group DNA igniting BLISS process - also ref: AMENTI principle in Anna Hayes - use the features of your starmap to lens your bliss pod to re-inhabit the heavens. How BIG is your lucid dream....)**

Two Thirds by David Percy and David Myers, Aulis Press, London. Excellent hundreds of photos of the geometry of crop circles (cancer building microwave selective melt of grain stalk diameter - the surface printer from the underground military mind control microwave dishes)... showing the attempt to re-construct the geometry tables to teach genepools to organize enough of their glandular magnetism (EMOTION) to stabilize their planets atmosphere etc. Example: crop circle shows the shape of the HAT OF OSIRIS (bit of a floppy cone) as the **CORRECT SHAPE OF A HEALTHY PERICARDIUM.. If we have the muscles necessary to FLEX the SHAPE of that cavity by INTENTION - then we have the skill to angularly lens (like the muscles flexing the eyeball shape to make FOCUS possible).. and steer the GRAVITY THRUST WHICH RESULTS FROM A PROPERLY FIRING / BLISSFUL - HEART. (Like tilting the shape of the nozzle below a rocket engine - except this is IMplosion steering not EXplosion). This is absolutely key to star navigating, time lord entry, guild navigators in Dune, Bardo navigating, shem-an-ic stellar lucid dreaming etc. Solar Shaman's egroup: soulinvitation.com/solarshamans solar heart community and yahoogroups.com**

Return of the Bird Tribes by Ken Carey. Iroquois and 5 nation confederacy history of the OPHANIM. Hints at the origin of western democracy.

Weather Engineering on the High Seas by Trevor Constable- Film- See how the Reichian layers CONE CAPACITOR which best pulls in rain storms off the ships deck - is in the correct 60 degree implosion cone angle of the concentric Dodeca. soulinvitation.com/rain soulinvitation.com/desertification

Holy Grail series summary:

Holy Blood Holy Grail
Messianic Legacy
Temple and the Lodge
Sword and the Grail
Holy Grail Across the Atlantic
Pandora's Box
Bloodline of the Holy Grail (see review in Nexus)
Genesis
Geneset
His Holy Place

Discovering the ancestry of Jesus in a bloodline will never be fulfilling until - Thoth's clue is understood. He (descended from Enki / Yalweh - the Ptah taal / Hermes etc.,) suggests the reason MAGdalen's kids had dark blood - THE STORY OF BLACK MADONNA - (Nubian / blue) was because he was the father. Akhanaton's (Ptah / Bird Tribe) kid Tut renamed Jesus by jealous Rabbi's, takes the copper blue blood from RIGEL in Orion where Thoth indicates his ancestors are from. Ask the Montauk boys about how interventionist the Rigelians are. Everyone is sitting around in stupid fascination at the pedigree for where messiahs / avatars come from - no one is nourished by the physics principles.

Personality worship will always be poison - like miracle worship- and a key way to determine which 'religions' are blood sucking parasites. (The 'priests' who brought you the enzyme to feed you like larvae to the astral milkhouse that is most churches - the sickening lie that - God is outside YOU!) . Star penetrating DNA arises with the ability to ignite it (implosively). That starts with the choice to take responsibility for your own destiny - quite the OPPOSITE of 'let go and let God'. nuff said.

The Way of the Scout by Tom Brown Jr. (The Tracker and others in series). Where does telepathy in the woods come from - but the efficient fractal compressing of CHARGE in perfect 'branching'.

Secret Places of the Lion by George Hunt Williamson. Excellent history of the bloodline of MERK (Enki) - why did they feel so star lost when they (Annunaki early family) crash landed here - Ea's Earth? Were they in fact needing to HIDE the psychokinesis potential of their own DNA (Anikin's Chloridan blood) from terrorizing Orion War Borg's by - cloning themselves into the Cro-magnon blood? When will the seed and egg shapeshifting implosive DNA worming - of those fish God's re-emerge to re-take the stars????? Truth is so much richer than fiction.

Secret of the Andes by Brother Philip. The Maxine light was a quartz crystal cube on which you might appear to vaporize if you stepped atop it. IF your DNA was compressible (shareable) you COULD then make the EL or phase shift This was another pen name of George Hunt Williamson / Michael d'Obrenovic author of Secret Place of the Lion, Road in the Sky (Star Maps in South America) - who worked with Elizabeth Van Buren :

Refuge of the Apolcalyse -Rennes le Chateaux the Key by Elizabeth Van Buren. Good in extending some of the Rennes star maps, and history (Et in Arcadia Ego means hide the branching of the blood tree in the new world)... Just like Ben Franklin's and Thomas Jefferson's late life disappointment - bad in discernment just which medium grade interventionist ET's they had been serving.

Codes of Light by Jessi Ayani. Tracks the MAG (Orion Queen blood) thru Joan of Arc, and back to the Andes. The Orion queens ALWAYS believe they have the CODES to ignite DNA... But they don't. (Anna Hayes revealing the MAG Pleadian line behind Marciniak for example as mostly interventionist / that is willing to take advantage of us / they are Beli Kurd - one of the branches of the interventionist Annu'hazi' LESS interested in preserving our freedom. The politics of Annunaki has never really had an altruistic motive. This is OK - but they haven't been very frank with us - their 'spawn'. Why can no Marciniak 'follower' ask where these guides REALLY live? - Why has no "Ascended Master" ever even HINTED at the parasite nature of the ET history of our DNA???)

I Remember Union - onward in the incomplete Magdalen memory - more archetype - less herstory.. Good clues tho about what it takes to wrap the body into genetic stillness capacitively - literally a swaddling cloth - to PROPERLY prepare to die - project the charge wave of your biological capacitance effectly into interplanetary spaces. Like Hiawatha inhabiting Niagara Falls.

Women with the Alabaster Jar. more on Magda..

The Magdalen Mystery (by Kent in Sante Fe) privately published - showed the virgo star map of the Gothic cathedrals she outlined in the teaching dream of Bernard of Clairveaux the builder Templar. She needed to use that magnetic lens the size of huge landscapes to reproject her TANTRIC SWOON - back into the stars- because that is where the body of her love (Jesus / Tut) now resided.

Mutant Message by Marlo Morgan- Do you hear your ancestors speak clearly in the song in your blood?

Monuments on Mars by Richard Hogland. Richard who claims to own Mars doesn't have a clue HOW paramagnetic dolmen archeologic stones WHEN placed at TETRAhedral latitudes - modulate planet spins potentially to better EMBED them in ZODIAC spin - which stabilizes the (recursive spin nature of) GRAVITY - to hold ATMOSPHERE!!! That is 'Total Recall' and Richard doesn't have it. At least he can be a pesky dog snapping at the lie-ing heels of NASA.

Anti Gravity & the Earth Grid by David Hatcher Childress. Classic for seeing the dodeca shape dynamic of the vector flexing Earth grid - snapping between cube-octa and dodeca/icosahedron as it prepares to compress. The reason the rock floated up in front of the cliff face when drummed by the cacophony of Tibetan instruments was the implosive phonon triggered the rock piezoelectrics to create an inverse capacitive low pressure bubble.

Temple in Man - Schwaller de Lubicz / Robert Lawlor. Vincent has wondered if Schwaller could be a name change to Fulcanelli. Expensive gorgeous book shows the history of Egyptian temple complex to imitate the capacitive charge symmetry of the human gland body - to excite bliss. (they knew that DNA could radiate charge ultimate into stars- they did not know how).

View Over Atlantis & City of Revelation by John Michell. First place to see the Roman Pace, Megalithic Yard, Pyramid Inch, English Foot, etc., all related exquisitely in a simple Golden Mean cascade. Very good at calling the METER a profane and evil measuring system. (literally EVIL in the technically correct sense that EVIL MEANS: failure to embed - the only way to KILL anything..) The books fail to explain that the only sacred and therefore sustainable units of measure (musical key of all of matter) are simply multiples (EMBEDDABLE) of the wavelengths of PLANK and HYDROGEN core. (fusion).
